BLOOM

BLOOM ricorda la preziosità delle bottiglie di profumo antiche e la forma dei diffusori orientali di essenze. A seconda del vetro e della fonte luminosa prescelta, l'effetto può essere più ovattato o sensuale. La magia dell'oggetto si sprigiona sia dal pezzo singolo che dalla combinazioni di più varianti. La linea si compone di lampade a sospensione e da tavolo disponibili sia con luce a LED che alogena. Il vetro è color rosa o grigio con lavorazione Balloton anche in versione satinata.

BLOOM calls to mind the preciousness of the old perfume bottles and the shape of oriental essence diffuser. According to type of glass and the lighting source, the effect can be more delicate or sensual. The object releases its magic both by a single piece or in a combination of elements. The range consists of pendant and table lamps available with LED or halogen light. The Balloton glass is pink or grey also available with frosted finishing.
