About BENTU

Bentu is an independent design brand founded in 2012. We're engaged in product design and innovation, combining design with manufacture. We're an experimental, explorative, and cross-over team. Based on our design, we make products that meet our daily need. Through a series of experiments and exploration, we make each material return to its nature by revealing its original texture.

In innate character, Bentu reverts to demand, close to indigenous culture; outer form, the so-called international design is, free from all the unnecessary, pursuing unrestrained styles and returning to the emphasis on function.

Bentu is focused on the R&D, design, production, sales and promotion of products. Our products cover lighting, home furnishing, outdoor furniture, wall decors and so on. Bentu's products are able to meet the international standards, every single accessory is original design and of high quality. Most of the products are already certified to CE, ROHS2.0, SAA, C-TICK, CCC, PSE, FCC and IC. We have our own IPR and more than 200 patents.

2 RECYCLE SERIES

Concrete Series

From building to products, concrete is back to design stage. Concrete's unique texture is highlight of interior styling , it can bring people a new feeling which can't from other materials.

Bentu pursues the original texture of materials. In order to retain the exquisite texture of concrete and keep the natural bubble holes , we do not add any resin. In terms of visual effect, our minimalist design achieve aesthetic sense and present the pure, clean, strong feeling of concrete.

Recycle Series

Recycling gives new lives to discarded materials and make them regain dignity.

Recycling deals with the possibility of combining“industry”and “nature”. With focus on human society and environmental waste, the recycle series adopts daily design and industrial manufacturing and takes on aesthetic effect. It is indeed a good way to serve the people and protect the environment.
